Le travaux publiés par la Société Royale du Canada peuvent être compris sous deux chefs principaux, quoiqu'ils se divisent en plusieurs branches. Il y a ceux qui appartiennent aux sciences proprement dites, et ceux qui sont du domaine de l'histoire. Les uns et les autres ne sortent guère des choses qui concernent notre pays et justifient entièrement le nom d'ouvrages canadiens, indiqué par le titre même de la Société et les adresses successives de ses présidents, au cours des vingt-cinq années que représentent nos volumes. Il faut dire aussi que la plupart des sujets que l'on s'attendait à voir traiter par les membres n'ont pas été négligés, ce qui compose aujourd'hui un ensemble remarquable d'études, ayant la valeur d'une bibliothèque choisie, mais qui n'était pas d'une consultation facile sans le secours d'un index, vu la dispersion des papiers dans ces innombrables pages.

Désormais, le chercheur pourra, en quelques minutes, retrouver n'importe quelle matière qui l'intéresse et se rendre compte de l'état où notre Société l'a amenée pour servir à des développements rationnels, sans craindre les répétitions. L'index sera commode, en tous temps, pour les références que l'on voudra faire dans le but de relier les diverses parties d'une question de science ou d'histoire.
